MINUTES Nº 035

Governance Committee ZERO Energy

Date: 21 October 2026 **Time:** 9:00 H **Duration:** — **Modality:** Virtual

---

1. Opening of the session

A quorum is established and a concise agenda is aligned, focused on internal operational improvements, the technical transition of contribution channels, and product evolution and community growth. It is agreed to address the items with a focus on execution and clarity for communication to the community.

---

2. Internal reorganization and transition from card payment to a wallet- and onramp-based flow

It is reported on operational adjustments aimed at internal efficiency, with no additional organizational detail. The card payment channel is deactivated and an alternative based on wallet and onramp is defined. Accordingly, the said channel is deactivated and an alternative based on wallet and onramp is defined, with supporting materials and the definition of network fees.

Agreement

- It is agreed to withdraw the card payment method.
- It is agreed to replace the card payment flow with a wallet- and onramp-based process, accompanied by multilingual tutorials and the definition of the model for covering network fees.
- It is agreed to complete the administrative closure of the previous payment channel, with the details recorded internally.

---

3. Status of tools, front-end, calendar and growth plan (leaders and airdrop)

The status of the operating stack (tools, front-end and website) and the acquisition assets (airdrop, academy, referrals and calendar) is presented. It is reported that community engagement dynamics are being activated to drive activities and expansion, without identification of internal structures.

Agreement

- It is agreed to initiate an intensive commercial execution phase, using the airdrop and the academy as entry points and the referral system as an incentive mechanism.
- It is maintained that the leaders’ group remains active and that participation in the weekly dynamics is invited.

4. Technical progress: smart contracts, integrations and visibility on the public dashboard

Progress on the Web3 layer (smart contracts and front-end) and the status of the necessary integrations with the external wallet and the public tracking dashboard are presented. Enabling continuous visualization of progress from the repository is proposed.

Agreement

- It is agreed to prioritize the completion of integrations (external wallet and synchronization of the repository with the public dashboard) and to prepare a technical demo when the system is stable.
- The reinforcement of technical assurances and external verifications will be studied, in accordance with the technical plan.

---

5. Internationalization: assessment of opening in a priority region of Asia, languages and materials

The opportunity to prioritize opening in Korea with local support is assessed, in view of the context and adoption signals. The languages and materials needed to facilitate such entry are reviewed, maintaining efficiency and content coherence.

Conclusion

- The consensus is maintained to prioritize a region in Asia as a path for community expansion, subject to local coordination and the internal roadmap.
- It is agreed to retain the base plan in English and to translate critical documents into Korean if the opening is confirmed.

---

6. Funding opportunities: analysis of forums and comparison with the community growth strategy in Asia

An analysis of participation in sector forums is reported and its fit with the current community growth strategy is debated. It is considered appropriate to compare this avenue with the plan for opening in Asia before committing resources.

Agreement

- It is agreed to postpone the decision on attending an international sector event, requesting formal clarifications from the organizer and comparing its potential with the alternative of opening in Asia.
- Community-based growth is maintained as the preferred strategic line; any alternative financing will be evaluated internally in accordance with the applicable regulations and communicated when appropriate.

---

7. Immediate commercial activation: airdrop, referrals and academy

With the operating stack ready, the plan for immediate commercial execution is activated. The combination of airdrop, referrals and academy is prioritized to accelerate user acquisition and engagement, supported by guides and coherent messaging.

Agreement

- It is agreed to mobilize the committee and the leaders' group to execute an intensive invitation campaign using referral links (airdrop and academy).
- The dissemination on social networks with approved and measurable messages will be studied, ensuring brand coherence and regulatory compliance.

---

8. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned.
