MINUTES Nº 038

Governance Committee ZERO Energy

Date: 10 November 2026 **Time:** 9:00 H **Modality:** Virtual

---

1. Opening of the session

The ordinary session is opened with the objective of reviewing event planning, the prioritization of commercial actions, and progress on documentation and protocol development. The meeting is held virtually in accordance with the established schedule.

---

2. Event in Madrid and prioritization of the sales funnel and community

The suitability of organizing an in-person event in Madrid in the short term is assessed against concentrating efforts on activating the sales funnel and working contact lists for the pre-sale and community growth. Operational workload and the track record of previous events are considered to estimate the real impact relative to the required effort.

Agreement

- It is agreed to postpone convening an in-person event in Madrid and to concentrate immediate efforts on activating and consolidating the sales funnel.
- It is agreed to prioritize work on contact lists and presentations over the coming weeks and to reassess the opportunity for an event when there is verifiable traction.
- It is agreed to revisit this agenda item at the beginning of next year to decide on an appropriate date, depending on progress.

---

3. Strategy in Korea: materials, pitch deck and first virtual meeting

Participation in a congress in another region is contrasted with opening the market in Korea through a gradual approach and online validation. The committee considers it more appropriate to begin with retail community building with a referral system and by sequencing virtual presentations before planning travel.

Materials and needs are reviewed: unifying a simplified investment pitch deck for a non-expert audience, use of audiovisual content and technical documentation on demand, as well as the possibility of translations if the initial response justifies it.

Agreement

- It is agreed to prioritize exploration of the Korean market through online validation and organic community growth, postponing decisions on travel and in-person events.

- It is agreed to advance a unified and simplified pitch deck in English, with the possibility of translation into Korean depending on the results of the first validation.
- It is agreed to use the landing page with a referral system to centralize materials and attribution, and to prepare a first virtual meeting with a small group, expanding progressively if traction is confirmed.
- It is agreed to evaluate, in the event of a positive response, the organization of a first in-person event at a later stage.

---

4. Public documentation and protocol development: status and next steps

Progress on publications in repositories and on the website is reviewed, including minutes, technical specifications, and the protocol's smart contracts. The value of these milestones as signals of verifiable progress for the community and potential stakeholders is underlined.

Agreement

- It is agreed to highlight the publication of documentation and smart contracts as evidence of progress during the current phase.
- It is agreed to hold technical meetings to review contracts and upcoming development milestones.

---

5. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned.
