

MINUTES N° 003

Governance Committee ZERO Energy

Date: 25 February 2026 **Time:** 9:00 AM **Modality:** Virtual

1. Opening of the session

The ordinary session of the Governance Committee is called to order with all permanent ambassadors in attendance. The main objectives of the meeting are to review the status of the governance repository, address operational aspects of the project, and analyse the community growth strategy.

2. Governance repository: folder structure

The committee reviews the status of the official governance repository. The creation of the main folder structure has been completed, comprising the following sections: **annexes**, **dao-transition**, **statutes**, **treasury**, and **votes**. The folders are currently empty, pending population with the corresponding documents as they are produced.

Agreement

- The folder structure of the governance repository, as designed, is hereby approved.
 - It is agreed to progressively populate the folders with the committee's official files as they become available.
 - The definition of the location for institutional graphic resources within the repository remains pending.
-

3. Contract signing: in-person and digital signature modalities

The committee addresses the signing modality for the project's formal contracts. The feasibility of in-person signing versus electronic digital signature solutions is analysed, taking into account both current requirements and the project's future expansion into other geographies.

Agreement

- Contracts currently in progress shall be formalised by means of **in-person signature**.
 - It is agreed to explore and prepare an **electronic digital signature** solution to provide coverage for remote signatories and to support the future scaling of the project. The specific terms and platform shall be defined at a later stage.
-

4. Growth metrics analysis

The committee reviews the evolution of the community's growth metrics. It is noted that the trend in new member onboarding is positive this week, surpassing the reference point of the previous week, which had presented a one-off distortion in the data.

Conclusion

- The growth trend continues in an upward direction on an organic basis.
 - The committee identifies the current moment as a significant opportunity to consolidate growth and agrees to sustain the momentum of member acquisition in a consistent manner.
-

5. Community growth strategy

The committee holds an extensive discussion on the acquisition strategy, the profiles of potential members, and the organic growth strategy of the community. The following aspects are addressed:

5.1 Team activation and collaborative dynamics

The committee views the team's activation positively and agrees to maintain an active collaborative dynamic oriented towards the sustained growth of the community.

Conclusion

- The committee agrees to intensify acquisition efforts by prioritising direct and personalised outreach over mass communications.

5.2 Profile diversity and acquisition strategies

The committee analyses the diversity of profiles that may join the community, ranging from investors with experience in cryptocurrencies to individuals with no prior knowledge, university students, and business profiles. It is concluded that each profile requires a tailored approach, and that the diversity of strategies constitutes a strength of the team.

The value of profile diversity within the community is recognised, along with the capacity of each segment to enrich the project's ecosystem, as well as the strategic interest in attracting profiles with sector-specific experience that lend credibility to the project.

Conclusion

- The committee agrees to enable specific informational sessions tailored to different profiles of interest, ensuring that all potential members have access to the information necessary to join the project.
- The committee reaffirms the strategic value of building a broad and diverse community as a solid foundation for the project.

5.3 Organic growth strategy and member support

The committee discusses the organic growth strategy of the community, based on the mentoring and training of new members. The committee underscores that the key factor is not solely acquisition, but rather the **accompaniment and support** provided to new members so that they, in turn, may actively participate in the growth of the project.

Agreement

- It is agreed to prioritise the quality of member support over the volume of simultaneous onboardings: quality accompaniment for new members is recommended, ensuring their effective integration into the community prior to scaling acquisition efforts.
 - The importance of having clear protocols, onboarding guides, and well-defined support materials in place is reinforced, in order to guarantee consistency throughout the process across the entire network.
-

6. Token system mechanics: exchange and liquidity

The committee reviews the current operation of the token exchange system and the available channels for community members wishing to manage their position.

Information

- The committee informs that the token exchange system is currently under development and will be available in due course.
- An **internal buy/sell order system** (internal exchange) is under development, which will allow members to publish and execute transactions among themselves at agreed prices. This system is in an advanced stage of development. The committee will communicate its availability to the community at the appropriate time.
- The committee analyses the available liquidity options and agrees to communicate the enabled channels to the community at the appropriate time.

Agreement

- It is agreed to complete the development of the internal exchange and to communicate its availability to the community at the appropriate time.
 - The committee reaffirms the long-term vision of the project and the importance of ensuring that the community understands the strategic value of maintaining their participation in the ecosystem.
-

7. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned. The next ordinary meeting will take place on Wednesday, **4 March 2026**, at 9:00 AM (Madrid).
