

MINUTES N° 028

Governance Committee ZERO Energy

Date: 2 September 2026 **Time:** 9:00 AM **Modality:** Virtual

1. Opening of the session

The Governance Committee holds its weekly session with the attendance of the majority of its members. Two absences are recorded: one justified on grounds of personal force majeure and one with no known justification. The session addresses the state of the project ahead of the launch scheduled for 15 September, as well as matters of internal governance and expansion.

2. Token promotion: extension of deadline to 15 September

The committee reviews the status of the current promotion, which provides a token bonus for participations exceeding the established threshold. It is noted that communication of this promotion to the community and the leadership group has not been sufficiently broad.

Agreement

- The promotion deadline is extended to **15 September 2026**.
 - An official communiqué addressed to the community and the leadership group will be issued immediately, presenting the measure as a deadline extension.
 - The communiqué will be accompanied by an explanatory video and direct outreach to network leaders.
-

3. Recognition of new Senator ranks

The committee is informed that several community members have attained the rank of **Senator** on their own merits within the platform. The committee agrees to give public visibility to these achievements.

Agreement

- Individual recognitions will be published for each new Senator.
 - The publications will be accompanied by screenshots of the recent investment table to reflect project activity.
 - The recognitions will be staggered across different days to maximise communicative impact.
-

4. Regularisation of Senator ranks for founding members

The committee addresses the pending regularisation of the Senator rank for founding members of the project who met the requirements from the first phase but whose formal recognition was deferred for operational reasons. Having verified compliance with the requirements, the committee proceeds with their formalisation.

Agreement

- The tokens corresponding to the Senator award will be delivered to the founding members who demonstrate fulfilment of the requirements, charged to the merit release of **September 2026**.
 - The financial terms are recorded internally.
 - The matter is hereby definitively resolved.
-

5. Continuity of a committee member following an external role change

The committee is informed that one of its members has stepped down from a position of responsibility at an external entity with which the project maintains a relationship. The committee takes note and clarifies its position on the matter.

Agreement

- The member in question **continues on the ZERO Energy Governance Committee** with full rights and under the same conditions as all other members.
 - The external role change does not affect their position or responsibilities within the committee.
-

6. Reward for smart contract development

In recognition of the technical development work carried out within the framework of the project, the committee agrees to deliver a token reward to those responsible for the development of the smart contracts.

Agreement

- An internally agreed quantity of tokens will be released and distributed among those responsible for the technical development.
 - The delivery will be executed in the merit release of **September 2026**.
 - The preferred account type of the recipients will be confirmed in advance.
-

7. Expansion of the Governance Committee

The committee analyses the possibility of incorporating new members to strengthen capabilities in strategic areas. The ideal profile and the onboarding process are discussed.

Agreement

- An informal search process is opened for up to **four new members**, with a maximum total of twelve.
 - Profiles with experience in **blockchain/crypto-assets, marketing, or legal** are prioritised.
 - The incorporation of diverse profiles is viewed positively, particularly in areas where the committee has lesser representation.
 - Each committee member will identify and approach candidates from their own network in a transparent manner, explaining the project, expectations, and conditions of participation.
 - Any incorporation will require committee approval.
-

8. Disciplinary measure for repeated absences

The committee notes that one member has failed to attend or justify their absence for several consecutive sessions, exceeding the limit established in the internal regulations.

Agreement

- A **disciplinary measure** is applied: the affected member will not receive the merit allocation corresponding to the month of **September 2026**.
 - The member will be formally notified of the situation, reminded of the attendance commitment, and informed of the opening of new committee vacancies.
 - Should the situation not improve, the next step provided for in the regulations is **removal from office**.
-

9. Master Document of the project and AI agent update

The committee is informed of the existence of a **Master Document** for the project, currently at an advanced stage of completion. This document sets out the definitive tokenomics, the staking and vesting model, and the optimised smart contract architecture.

Among the key technical aspects highlighted:

- Accumulated merits will be converted into **ZERO REC** at the point of **claim**, automatically entering a staking contract with an initial lock-up period followed by progressive monthly release.
- The number of smart contracts has been reduced and optimised, facilitating auditing and reducing costs.

Agreement

- The Master Document is distributed to the committee for review prior to the next session.
 - The **ZERO Energy AI agent** will be updated with the content of the document.
 - Completion of the definitive technical section remains pending until the development team delivers the tokenomics with final codes and contracts.
-

10. 15 September airdrop: status and communication plan

The committee reviews the state of preparation for the airdrop scheduled for **15 September 2026** and the associated communication plan.

Information

- The launch is contingent upon the completion of the technical developments required for integration between platforms.
- From 15 September onwards, content publication will be activated across all project channels (currently six or seven active channels), with organic distribution.
- Paid advertising accounts on certain platforms are blocked due to sector policies. Members are encouraged to amplify publications from their personal profiles.
- In parallel with the airdrop, a **training website** will be launched where users can study the project and earn additional merits.

Agreement

- The target of **15 September** for the airdrop launch is maintained, subject to technical availability.
 - Work will proceed on the preparation and scheduling of content across all channels.
-

11. ZERO Energy company page on LinkedIn

The need to create a **company page on LinkedIn** for ZERO Energy is raised, which would allow committee members and the community to link their participation in the project in a professional and visible manner.

Agreement

- The creation of the ZERO Energy company page on LinkedIn is agreed.
 - A committee member assumes responsibility for carrying this out during the current month.
-

12. Review of the WhatsApp leadership group

The committee analyses the composition and functioning of the WhatsApp group intended for project leaders, noting that not all participants meet the expected activity and rank criteria.

Agreement

- A **progressive review** of the group's composition is agreed.
 - The criterion for continued membership will be accreditation of the rank of **Ambassador or Senator**, together with genuine and sustained activity in recruitment and contribution to the project.
 - The review will be carried out gradually, not immediately.
-

13. Expansion strategy: item deferred to the next session

A strategic reflection is introduced on the need to drive **movement and active recruitment** of new participants in the project. It is noted that the project has advanced significantly in the construction of tools and structures, but that growth in the active participant base requires a renewed and more direct approach.

Conclusion

- The item is **deferred to the next session** as the main agenda point.
 - It is requested that it appear explicitly on the agenda under the heading "**Expansion: strategy and action plan**".
 - Interested members will prepare concrete proposals for presentation at the next meeting.
-

14. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned.
