MINUTES Nº 036

Governance Committee ZERO Energy

Date: 28 October 2026 **Time:** 9:00 H **Modality:** Virtual

---

1. Opening of the session

The session opens with verification of quorum and validation of the agenda. The primary objective is to coordinate the meeting calendar, prioritize community growth actions, and advance treasury and technical development matters.

---

2. Daylight Saving Time (DST) change and adjustment of invitations

The impact caused by the time change and its effect on attendance at sessions is analyzed. Options are reviewed to adjust the meeting invitation and reinforce the use of the calendar in local time.

Agreement

- It is agreed to consult with the affected participants on whether they can join while maintaining the current time, adjusting it within the same day, or changing the day of the session.
- It is agreed to prioritize changing the day over changing the time to avoid difficult-to-accommodate time slots.
- It is agreed to consider Tuesday or Thursday at 09:00 (Madrid time) as preferred options, avoiding Monday due to operational availability.
- It is agreed to reinforce preventive communication ahead of future time changes and to remind participants to use the calendar in local time.

---

3. Asian market: legal approach vs. community-first

A comprehensive legal approach for entering an Asian market is contrasted with a community-first approach. The advisability of not blocking execution while specific legal restrictions are clarified is discussed.

Agreement

- It is agreed to prioritize community actions while evaluating local legal and corporate alternatives, without anticipating formal decisions.
- It is agreed to request a concrete list of legal restrictions applicable to pre-sales and community-building activities in that market.
- It is agreed to activate exploratory contacts in parallel with the legal analysis.

4. Community and capitalization: funnel, duplication, and leader activation

The status of the communication funnel and the three-step operating method (preparation, connection, and duplication) to drive growth is presented. The need to accelerate the pace of leader activation and public sessions is emphasized.

Agreement

- It is agreed to finalize during the week the pending funnel components and to start execution with the three-step method.
- It is agreed that each member will maintain an updated contact list for internal follow-up, in compliance with data protection regulations.
- It is agreed to boost the current incentives program and integrate the academy as an entry pathway to the ecosystem, avoiding the specification of volumes or specific scopes.
- It is agreed to coordinate an initial period of intensive work among those responsible for communications to fine-tune messaging, pace, and operations.

---

5. Immediate levers: event and micro-meetings

The operating context and initiatives to drive community growth and project dissemination are reviewed. Immediate tactical actions such as focused meetups and a possible event are considered.

Agreement

- It is agreed to explore a micro-meeting with a small group of contacts, with a presentation by committee members, in either in-person or online format.
- It is agreed to decide at the next session whether to organize an event before year-end, with format and location to be defined, or to prioritize the virtual format.
- It is agreed to focus November on acquisition actions and community expansion.

---

6. Treasury: multisig, signatories, and devices

Completing before year-end the transition to a reinforced multi-signature treasury and expanding the number of signatories is proposed. The modality for executing the signing ceremony is discussed.

Agreement

- It is agreed to postpone to a forthcoming session the decision on the modality of the planned signing ceremony, without specifying dates.

- It is agreed to reinforce the multi-signature treasury model and complete the transition by incorporating additional profiles, without detailing thresholds, vacancies, or operational aspects.

---

7. Technical integrations and development transparency

An update is provided on coordination with the technical provider to improve public traceability of development and to evaluate the sponsorship of transaction costs in the wallet. Arrangements are scheduled for repository opening and roadmap visibility.

Agreement

- It is agreed to request an open repository and commit traceability to audit the progress of the smart contracts.
- It is agreed to evaluate options to optimize transaction costs and, if appropriate, to communicate improvements in this regard, without detailing mechanisms until implementation.

---

8. Communications: “Zero News”, unified website, and calendar

The weekly “Zero News” piece is presented within a unified communications strategy that integrates the website, public documentation, academy, airdrop, and session calendar. Coordinated dissemination across all channels is emphasized.

Agreement

- It is agreed to publish and disseminate “Zero News” weekly across all channels and contact lists, sharing reusable materials.
- It is agreed to reinforce the use of the calendar integrated into the website, with the instruction to save it in local time.

---

9. Internal organization and miscellaneous

Quick-resolution organizational matters and internal coordination reminders are addressed.

Agreement

- It is agreed to resolve an outstanding internal communications item during the day.
- It is agreed to decide at the next session on the possible December event and the potential change of day for the weekly session.

---

10. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned.
